DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, word-labels identifying the numbers in the drawings must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2645

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by **Chuah et al.** (US 6,587,672).

As to Claim 1, with respect to Figures 1 and 3-7, **Chuah** teaches a radio mobile telecommunications system comprising a base transceiver station (6) arranged to manage a plurality of mobile systems (2,4) within at least one telecommunications cell (Col. 6, lines 54-56);

the base station (6) having means to provide an acquisition indication channel by which preamble signals (Figure 8B, label 102) sent by a mobile system (2) to the base station (6) are acknowledged when the strength of a preamble signal (Figure 6A) reaches a predetermined level,

characterized in that the acquisition indication channel is further arranged to send a negative acquisition signal (Figure 6B, Retx) when a message (104) sent by the mobile system (2) is unacceptable (Figure 7).

Application/Control Number: 09/936,038

Art Unit: 2645

As to Claim 2, Chuah teaches a system according to claim 1 in which a negative acquisition signal (Retx) is sent when the message (104) sent by the mobile system (2) fails a cyclic redundancy code check performed in the base transceiver station (Col. 8, lines 20-27).

As to Claim 3, with respect to Figures 1,3-7, Chuah teaches a method of operating a radio mobile telecommunications system comprises:

sending spaced preambles (Figure 8A) of increasing strength from a mobile (2) to a base transceiver station (6);

sending a preamble acknowledgement signal (Figure 8C, Downlink) on an acquisition indication channel from the base transceiver station (6) to the mobile system (2) when a preamble (102) reaches an acceptable strength; and

sending a message signal (104) from the mobile system (2) to the base transceiver station (6), characterized by:

further sending a negative acknowledgement signal (Retx) on said acquisition indication channel from the base transceiver station (6) to the mobile system (2) indicating a corrupt message (104 and Figure 7).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Cao et al. (US 6,292,471) teach controlling signal strengths between base stations and mobile stations.

Art Unit: 2645

Bark et al. (US 6,628,956) teach adapting transmit power between mobile stations and base stations.

5. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231 or faxed to:

(703) 872-9314, (for formal communications intended for entry)

Or:

(703) 306-0377 (for customer service assistance)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Allan Hoosain** whose telephone number is (703) 305-4012. The examiner can normally be reached on Monday to Friday from 8 am to 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Fan Tsang**, can be reached on (703) 305-4895.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
